THE JOURNAL OF THE SOCIETY OF AUTOMOTIVE ENGINEERS

INDEX TO VOLUME XI, JULY-DECEMBER, 1922

	PAGES
July	1-126
August	127-222
September	223-304
October	305-384
November	385-460
December	461-576

A

A E F artillery gunfire 429

Aberdeen Proving Ground Meeting, S A E

Announced 281
Reviewed 458

Activities of the Sections 216, 292, 380, 454, 564
Actual and ideal bearing differences 51

Addresses

Bachman, B B 9
Detroit Production dinner 548
du Pont, P S 548
Emmons, H H 548
Kettering, C F 549

Advantages of light-weight reciprocating parts (L H Pomeroy) 508
Aeronautic Association, National 413
Aeronautic Safety Code 295
Aeronautic safety fuel-tank awards 187

Aeronautic Session

At annual meeting 552
At summer meeting 4

Aeronautical Safety Code Sectional Committee, personnel 306

Aeronautics

Air Institute meeting 413
Air Mail 413
British prizes for papers 231
Commercial air-transport 414
Engine research 33
Gasoline piping 34
Machines 34
Navigation 34
Night flying 414
Progress of British research 33
Safety code 295
Safety fuel-tank awards 187

Agricultural Power Equipment Division, S A E

Report at summer meeting 198
Subjects under consideration 555

Air and fuel charge projected against the hot surface 31
Air-cooled cylinder design and development, some aspects of 363
Air-cooled engine papers at annual meeting 552
Air Institute meeting 413
Air Mail 413

Air Mail Service

Casualties 436
Cost of operation 437
Equipment 436
Organization 436
Performance 436
Present status 435

Aircraft, method of developing engines 240
Airplane design and performance improvements since the armistice (Lieut C N Monteith) 320
Airplane performance formulas (Edward P Warner) 248

Airplanes

All-metal construction 322
All-metal construction requirements 498
Design and performance improvements since the armistice 320
Design features 320
Modern and all-metal construction 495
Performance 320
Performance formulas 248
Progress of development 495
Structural problems 495
Thick-wing problems 497
Variable-area and variable-camber wings 321

All-metal construction requirements of airplanes 498

Alloys

Aluminum 259
Pistons of aluminum 258

Aluminum-alloy piston (James E Diamond) 258
Aluminum foundries, sands used in 194
Aluminum pistons (Ferdinand Jehle and Frank Jardine) 225

Aluminum

Alloy piston 258
Alloys 259
Comparison of steel connecting-rods in practice with 513
Connecting-rods 512
Pistons 225
Sheets compared with steel 511
Use of, in automotive industry 510

American and European practice of using tires 443
American automotive brake and clutch practice, European and (H G Farwell) 67
American Engineering Standards Committee, work of 458
American Sectional Committee on Ball Bearings, activities 117
American Sectional Committee on Bolt, Nut and Rivet Proportions, activities 118
Annual dinner burlesqued 121

Annual Meeting, S A E

Aeronautic session 552
Air-cooled engine papers 552
Announced 551
Body engineering session 551
Cooperative fuel research session 552
Dinner announced 551
Fuel and engine papers 552
Papers for 281
Railroad fares reduced 551
Technical sessions 551

Application of group standard-time 404
Application of the recommended plotting method 52
Artificial cooling of tires 134

Automobiles

Basic material 463
Carburetion 181
Case-hardened crankshaft 399
Cooperation in production 562
Cost of labor per car 521
Differential gears for passenger cars 378
Duralumin parts 480
Economy contests in America desirable 185
Education of the buying public 185
Electric wiring for 430
Experience notes from a production notebook 409
Ford engine-cylinder production 463
High-tension ignition 430
Hot-swaged rear-axle drive-shaft 400
Ideal carbureter 182
Lighting and low-tension ignition 430
Load on the engine 183
Low-tension ignition 430
Materials 561
More miles per gallon of fuel 181
Overhead-camshaft engines 244
Production man's place in our industry 561
Production of the air-cooled cylinder 398
Running-in brake-bands 409
Service-man versus car-owner 139
Service-man's problem 140
Service problem 139
Skilled workmen for standard machines 523
Some unique features of production 398
Special machine 521
Starting 431
Stresses and wear in tires 438
Timing of the spark 182
Training of production men 561
Unfair service demands 141
Why over-rich mixtures are used 182

Automotive equipment in road construction (A C Godward) 355

Automotive Industry

Advantages of light-weight reciprocating parts 508
European and American brake and clutch practice 67
New developments 12
Service-man's critical estimate of engineering 173
Special fixture design 473
Special machinery 472
Standard equipment 473
Standard versus special machine-tools for production 472
Use of aluminum 510
Wormwheels and bearings 479

Automotive rail-cars and their future development (L G Plant) 484

Axle and Wheels Division, S A E

Personnel 529
Report at annual meeting 529
Report at summer meeting 198
Subjects under consideration 555

Axles

Possibilities in rear, standardization 334
Stands 65

B

Babbitt, S A E, standard specifications 550
Bachman, B B, presidential address 9
Backlash and noise in gear-teeth 437
BAGNALL-WILD, BRIG-GEN R K, ON PROGRESS OF BRITISH AERONAUTICAL RESEARCH 33
BAKER, A J, ON SELECTION OF MACHINE-TOOLS 520
Balancing machine 370

Ball and Roller Bearings Division, S A E

Personnel 530
Progress report 209
Report at annual meeting 530
Subjects under consideration 555

Ball Bearings

American Sectional committee 117
Clearances 412

BALSILLIE, J G, ON MOTOR-VEHICLE HEAD-LAMPS AND ROAD-LIGHTING 557
BARNARD, 4TH, D P, ON MEASUREMENT OF THE PROPERTY OF OILINESS 143
BARNARD, 4TH, D P, ON MECHANISM OF LUBRICATION 49
Basis of purchase of new machines 523
BEAN, W L, ON SOME REQUIREMENTS FOR THE RAIL MOTOR-CAR 482

Bearings

Actual and ideal differences 51
Application of the recommended plotting method 52
Automotive wormwheels and 479
Effect of variable clearance 53
Factors affecting the critical point of film rupture 54
Miscellaneous effects 56
Oiliness effects 56
Oiling method and oiliness-factor effects 52
Theoretical curves for ideal 50

Benzol

Comparative merits of, and gasoline as engine fuels 359
Comparison with gasoline specifications 359
Sulphur in 358

BERRY, O C, ON MORE CAR-MILES PER GALLON OF FUEL 181
Bevel-gear testing machine, Saurer 193
Bevel gears 376
Bibliography on mechanism of lubrication 60
Blast furnace and coke ovens at Ford plant 465
Body engineering sessions at annual meeting 551
Bodies, bus 167

Boilers

History of development of Winslow 267
Major advantages of Winslow 270
Possible types 266
Winslow automotive 265

BOYD, T A, ON DETONATION CHARACTERISTICS OF SOME BLENDED MOTOR-FUELS 247
Brake-bands, running in 409

Brakes

American and European automotive clutch and, practice 67
Coefficient of friction 77
Continental countries 69
Different types 70
Effective for motorbus 17
England 67

British prizes for aeronautic papers 231
BRODIE, J, ON EXPERIENCE NOTES FROM A PRODUCTION NOTEBOOK 409
BUFFINGTON, H C, ON PROGRESS MADE IN GARAGE EQUIPMENT 61
BULL, A A, ON OIL CONSUMPTION 232, 491
Bureau of Standards fuel tests 252

C

Camber and gather relationships in front-wheel alignment (J C Sproull) 91
Camber, gather and tire wear 92
Camp equipment for road-building 346
Camshaft, overhead, passenger-car engines 244
Car-owner versus the service-man (J F Page) 139
Carbon-forming properties of oils 38
Carbureters, ideal 182
Carburetion 181

Castings

Centrifugal 445
Centrifugal process of producing 563
Heat-treating process 82

Causes of noise in gears 195
Center of gravity for motorbuses, low 15
Centrifugal castings 445
Centrifugal process of casting iron 563
Chain Division, S A E, subjects under consideration 555
CHANDLER, M E, ON HOT-SPOT METHOD OF HEAVY-FUEL PREPARATION 27, 474
Chassis components for bus service 166
Chassis friction losses (E H Lockwood) 415

Chassis

Friction losses 415
Friction of parts 418
Lubrication 340
Measurement of rolling friction 416
Resistance formulas 419
Total frictional resistance 416

Chicago Service Meeting, S A E

Announced 552
Discussion of papers at 17

Chronicle and comment 127, 223, 305, 385, 461
Clear vision for driver of motorbus 18

Clearance

Ball bearing 412
Effect of variables, in bearings 53

Clearing-house for research 250
Clogging of metal capillaries 154
Clutch, European and American automotive brake and, practice 67
Coefficient of friction of brakes 77
Coke ovens and blast furnace at Ford plant 465
Combination and opposed-piston engines 100
Commercial air transport 414
Commercial-body supply and service (C M Manly and C B Veal) 179

Committees

American Engineering Standards work 458
Gage Steel Steering of Bureau of Standards 349

Comparative merits of benzol and gasoline as engine fuels (W O Hinckley) 359
Comparison of steel and aluminum connecting-rods in practice 513
Concrete road requirements 325
Conditions favorable to grouping 406

Connecting-Rods

Aluminum 512
Aluminum-alloy 400
Comparison of steel and aluminum 513
Design 513
Duralumin 480
Manufacturing considerations 514

Control of operating tool and supply cost (F A Mance) 407
Convection currents in tubes 132
Cooperation in production 562
Cooperative fuel research session at annual meeting 552
Cord tires 421
Correct gather for front wheels 116
Corrugated reflectors 558

Costs

Air Mail Service operation 437
Control of operating tool and supply 407
Earth removal 348
Labor per car 521
Operating tractors and horse-drawn outfits 347
Reliability and low maintenance of rail motor cars 486

Council Meeting, S A E

June and July 220
July 294
September 306
October 408

CRAIN, H J, ON EXPERIENCE NOTES FROM A PRODUCTION NOTEBOOK 409
CRANE, H M, ON NEW SYSTEM OF SPRING-SUSPENSION FOR AUTOMOTIVE VEHICLES 236
Crankcase oil dilution problem and its solution (William F Parish) 35

Crankcase

Oil vac-refiner 43
Temperature of oil in the 43

Crankshaft, case-hardened 399
Current standardization work 117, 295, 448
Cutting machines cause errors in gear tooth 395

Cylinders

Ford engine production 463
Machining the 471
Making the block 468
Piston relations and 258
Preventing liquid fuel reaching 48
Production of the air-cooled 398
Some aspects of air-cooled design and development 363
Vaporization in 312

D

DANIELS, R W, ON DURALUMIN 477
Deeley-type friction-machine, results on 145
Definitions used for mechanism of lubrication 49
Design factors of motorbus, controlling 14
Desirable light-distribution 558
Detonation characteristics of some blended motor-fuels (Thomas Midgley, Jr, and T A Boyd) 247
Detroit Production dinner 548

Detroit Production Meeting, S A E

Dinner addresses 548
Outline of program 373
Reviewed 387

Development of the lubrication of prime-movers 41
DIAMOND, JAMES E, ON ALUMINUM-ALLOY PISTON 258
DICKINSON, DR H C, ON PROGRESS OF THE RESEARCH DEPARTMENT 249
Diesel-engine fuel-consumption 103

Dilution

Influence of, upon the oil trade 37
Of oil in present automotive engine 38

Dinners

Annual, announced 551
Detroit Production addresses 548
Production meeting 390

Discussion

Chicago service meeting papers 173
Minneapolis tractor meeting papers 158
Semi-annual meeting papers 232

Division meetings, tentative schedule of S A E 295
Drill sizes, tap 382
Drive-shaft, hot-swaged rear-axle 400
DUNK, WILLIAM, ON SOME UNIQUE FEATURES OF AUTOMOBILE PRODUCTION 398
Duralumin (R W Daniels) 477

Duralumin

Automobile parts 480
Automotive wormwheels and bearings 479
Connecting-rods 480
Gears 480
Improvement of physical properties 478
Material specification for 477

Dynamometers, fan 397

E

Economic foundation for highways 219
Economy contests in America desirable 185
Education for highway engineering and transport 401
Education of the buying public 185
Effect of cooling-water temperature on pistons 226
Effect of diluted oil on engine friction 40
Effect of material being machined 85
Effect of rate of heating in hardening steels 257
Effect of variable clearance 53

Efficiency

At different loads 184
Mechanical of gears 195
Relative engine 329
Volumetric 329

Electric Vehicle Division, S A E

Personnel 535
Report at annual meeting 535
Subjects under consideration 555

Electric wiring for automobiles (William S Haggott) 430

Electrical Equipment Division, S A E

Activities 296, 448, 450, 452, 453
Personnel 499, 535
Report at annual meeting 535
Report at summer meeting 199
Subjects under consideration 555

Electrical-resistance measurements of adsorbed films 152
ELLENWOOD, F O, ON TEMPERATURE OF PNEUMATIC TRUCK-TIRES 129
End-point indicates, what the 360

Engine Division, S A E

Activities 118
Personnel 538
Progress report 210
Report at annual meeting 538
Report at summer meeting 199
Subjects under consideration 555
Unaccepted recommendation 208

Engineer, motor-vehicle killings and the 473
Engineering education for highway 401

Engines

Advantages of light-weight reciprocating parts 508
Aeronautic research 33
Air-cooled, papers at annual meeting 552
Case-hardened crankshaft 399
Combination and opposed-piston 100
Comparative merits of benzol and gasoline as fuels 359
Compound 102
Connecting-rod 400
Departure from original design 95
Diesel, fuel-consumption 103
Dilution of oil in the present automotive 38
Effect of diluted oil on friction 40
Efficiency at different loads 184
Ford cylinder production 463
Fundamentals of internal-combustion design 328
Gas and oil leakage 262
High temperature causes excessive valve-seat wear 566
Influence of changes in density and stress on horsepower developed 509
Internal-combustion power for road-grading machinery 323
Internal friction and summary 330
Interpretation of data on tests 286
Latest European practice 102
Load on the 183
Manifold gas velocity 285
Mechanical construction problems 330
Mechanical injection and double-acting Diesel 101
Method of developing aircraft 240
Overhead-camshaft passenger-car 244
Papers at annual meeting 552
Piston and cylinder relations 258
Piston-rings and ring grooves 262
Puzzling knock 410
Relative efficiency 329
Some aspects of air-cooled cylinder design and development 363
Speed 329
Stands 65
Tractor 324
Valve actions in relation to internal-combustion, design 284
Vaporization in intake 310
Variations in modern Diesel design 93
Volumetric efficiency 329
Weight saving considered in detail 510

Entertainment for ladies at summer meeting 122
Etching reagents for alloy-steels 34

European and American automotive brake and clutch practice (H G Farwell) 67
European and American practice of using tires 443
European industrial outlook 162
Experience notes from a production notebook (H J Crain and J Brodie) 409
Experimental determination of heating action 31
Experiments, light-distribution 557

F

Fabric tires 419
Factors affecting the critical point of film rupture 54
Fan dynamometers 397
Fare-collection devices on motorbuses 170
Fares for motorbuses 13
Farm implement, relation of tractor to 159
FARWELL, H G, ON EUROPEAN AND AMERICAN AUTOMOTIVE BRAKE AND CLUTCH PRACTICE 67
Field for the rail motor-car (Roy V Wright) 481
Fixtures, design of special 473
FLAGLE, W W, ON MALLEABLE-IRON DRILLING DATA 81
Fluid-film lubrication, fundamental laws of 50
Ford engine-cylinder production (P E Haglund and I B Scofield) 463
FORD, JAMES A, ON PROCESSING SPLINE SHAFTS BY A NEW METHOD 432
Foreign trade 255, 345
Foreign trade, mutual benefits of 90
Foundries, sands used in aluminum 194
Foundry and powerhouse at Ford plant 467

Frames Division, S A E

Activities 452
Personnel 539
Report at annual meeting 539
Subjects under consideration 555

Friction

Chassis losses 415
Coefficient of brakes 77
Effect of diluted oil on engine 40
Internal engine 330
Of parts 418

Frictional resistance, total 416
Fuel and engine papers at annual meeting 552
Fuel and engine session at summer meeting 6

Fuel-Consumption

Diesel engine 103
Minimum, of motorbuses 24

Fuels

Aeronautic safety tank awards 187
Bureau of Standards tests 252
Comparative merits of benzol and gasoline as engine 359
Detonation characteristics of some blended motor 247
Final limitations of the hot-spot method 475
For test purposes 252
Heat applied directly to 29
Heterogeneous mixtures of motor 310
Homogeneous mixture quality 32
Hot-spot method of heavy, preparation 27, 474
Laboratory versus motor-car heat conditions 476
Minimum consumption by motorbuses 24
More car-miles per gallon 181
Nature of action at hot-spot 474
Papers at annual meeting 552
Preventing liquid, reaching the cylinder 48
Research 251
Research session at annual meeting 552
Separating hot-spot 476
Specific requirements of preparation 27
Sulphur in benzol 358
Supplementary tests 252
Vaporization of motor 307
Why over-rich mixtures are used 182

Fundamental laws of fluid-film lubrication 50
Fundamentals of internal-combustion engine design (L H Pomeroy) 328

G

Gage-steel investigation 507
Gage steel steering committee of Bureau of Standards 349

Garage

Modern Parisian 231
Progress made in equipment 61

Gasoline-driven motor-coach for railroad service (C O Guernsey) 275
Gasoline piping 34

Gasoline

Comparative merits of benzol and, as engine fuels 359
Comparison of benzol with specifications 359
Motor-coach for railroad service 275
Oil leakage and 262
What the end-point indicates 360

Gather

Correct for front wheels 116
Tire wear and 92

Gearbox lubricant 425

Gears

Application of formulas 377
Backlash and noise in teeth 437
Bibliography 196
Causes of noise 195
Differential for passenger cars 378
Duralumin 480
Errors caused by cutting machines 395
Grinding tooth-forms 397
Hardening of 397
Helical bevel 377
Maag 378
Mechanical efficiency 195
Noise investigation 411
Noises 391
Oil-pump noise 410
Rear-axle bevel 437
Rear-axle calculations by the compressive-stress method 375
Saurer testing machine for bevel 193
Some causes of tooth errors and their detection 391
Spur and bevel 376
Strength 88
Tooth-forms 396
Wearing quality 89

Germany can pay, what 47
GODWARD, A C, ON AUTOMOTIVE EQUIPMENT IN ROAD CONSTRUCTION 355
GOWDY, R C, ON MOTOR-VEHICLE HEADLAMPS AND ROAD-LIGHTING 557
Gray and malleable iron differences 82
GREEN, G A, ON PRINCIPLES OF MOTORBUS DESIGN AND OPERATION 13, 188
Grinding gear-tooth forms 397
Group-bonus wage-incentive plan (E Karl Wennerlund) 402
Grouping conditions favorable to 406
GUERNSEY, C O, ON GASOLINE-DRIVEN MOTOR-COACH FOR RAILROAD SERVICE 275
Gunfire, A E F artillery 429

H

HAGGOTT, WILLIAM S, ON ELECTRIC WIRING FOR AUTOMOBILES 430

Laboratory versus motor-car heat conditions 476
Leakage corrections of tires 130
Leakage of gas and oil 262
Letter ballot on adoption of standards 379
Light concentration 560

Light-Distribution

Desirable 558
Experiments 557

Lighting and low-tension ignition 430

Lighting Division, S A E

Activities 117, 118, 449, 453
Personnel 539
Report at annual meeting 539
Report at summer meeting 200
Subject assigned 220
Subjects under consideration 555

LISLE, T O, ON VARIATIONS IN MODERN DIESEL-ENGINE DESIGN 93
LOCKWOOD, E H, ON CHASSIS FRICTION LOSSES 415

Lubricants

Measurement of the property of oiliness 143
Reclaiming oils 157
Viscosity of diluted oils 40

Lubricants Division, S A E

Activities 449, 453
Personnel 220, 539
Progress report 213
Report at annual meeting 540
Subjects under consideration 555

Lubrication

Bibliography 60
Chassis 340
Clogging of metal capillaries 154
Crankcase oil-dilution problem and its solution 35
Development of prime-movers 41
Electrical-resistance measurements of adsorbed films 152
Fundamental laws of fluid-film 50
Gearbox 425
Measurement of the static-friction coefficient 148
Mechanism of 49
Oiling method and oiliness-factor effects 52
Results on a Deeley-type friction-machine 145
Significance of surface-tension measurements 150
Solving the problem 42
Viscosity limits of oil for 36

M

Machine-tools for automotive production, standard versus special 472

Machine-Tools

Basis of purchase 523
Industry 520
Selection of 520
Skilled workmen for standard 523
Special, for automobiles 521

Machining properties of malleable-iron 82
Machining the cylinder 471
MAGEE, JOHN, ON PISTON-RINGS 273
Malleable-iron drilling data (H A Schwartz and W W Flagle) 81

Malleable Iron

Differences between gray and 82
Effect of being machined 84
Graphic test-results 83
Machining properties of 82

MANCE, F A, ON CONTROL OF OPERATING TOOL AND SUPPLY COST 407
MANES, C R, ON PISTON-RINGS AND RING GROOVES 262

Manifold

Air and fuel charge projected against the hot surface 31
Gas velocity 285
Heat applied directly to the air 28
Heat applied directly to the fuel 29
Hot-spot method of heavy-fuel preparation 27

MANLY, C M, ON COMMERCIAL-BODY SUPPLY AND SERVICE 179
Manufacturing considerations of connecting-rods 514
Means of temperature control 32
Measurement of rolling friction 416
Measurement of the property of oiliness (Robert E Wilson and Daniel P Barnard, 4th) 143
Measurement of the static-friction coefficient 148
Mechanical efficiency of gears 195
Mechanical injection and double-acting Diesel engines 101
Mechanical transmission and design 481
Mechanism of lubrication (R E Wilson and D P Barnard, 4th) 49

Meetings

Aberdeen Proving Ground, S A E 281, 458
Annual, announced 551
Chicago service announced 552
Council
June and July 229
July 294
September 306
October 408
Detroit Production, S A E 281, 373, 387
Standards Committee at summer meeting 198
Summer, S A E 1
Tentative schedule of division 295

Meetings Committee, S A E

Activities 9
Membership 367

Membership Committee, S A E

Activities 9
Report at summer meeting 3

Metal and wood wheels 335
Method of developing aircraft engines (Capt George E A Hallett) 240
Methods of heat application 27
Metropolitan Section's visit to West Point 444
MIDGLEY, THOMAS, JR, ON DETONATION CHARACTERISTICS OF SOME BLENDED MOTOR-FUELS 247
Minneapolis tractor meeting papers, discussion of 158
Miscellaneous effects 56
MITCHELL, R K, ON STANDARD VERSUS SPECIAL MACHINE-TOOLS FOR AUTOMOTIVE PRODUCTION 472
MOCK, F C, ON HOT-SPOT METHOD OF HEAVY-FUEL PREPARATION 27, 474
Modern airplane and all-metal construction (William B Stout) 495
Modern Parisian garage 231
Molding sand investigation 471
MONTEITH, LIEUT C N, ON AIRPLANE DESIGN AND PERFORMANCE IMPROVEMENTS SINCE THE ARMISTICE 320
MOORE, J C, ON VALVE ACTIONS IN RELATION TO INTERNAL-COMBUSTION-ENGINE DESIGN 284
More car-miles per gallon of fuel (O C Berry) 181

Motorboat Division, S A E

Activities 449, 450
Subjects assigned 408
Subjects under consideration 555

Motorbus session at summer meeting 8

Motorbuses

Bodies 167
Chassis components for service 166
Clear vision for driver 18
Comfort and convenience factors 168
Comfort and convenience for driver 18
Comfort and convenience of the public 19
Controlling design factors 14
Country 164
Easy steering 18
Effective brakes 17
Fare-collection devices 170
Heating, lighting and ventilation 169
Inter-city 164
Low center of gravity 15
Matter of fares 13
Maximum accessibility 22
Maximum safe speed 24
Maximum tire-mileage 25
Minimum consumption of fuel 24
Minimum consumption of labor and material 23
Minimum weight 24
Principles of design and operation 13, 188
Reliability 22
Riding ability 19
Service requirements 14
Short turning-radius 17
Silence of operation 21
Smoothness of starting and stopping 22
Some fundamental characteristics of present-day 163
State and local regulations 170
Steam and electric motive power 165
Unwisdom of overloading 13
Wide frame, track and spring center 16

Motor cars on rails 481

Motor-Coach

Gasoline-driven, for railroad service 275
Service possibilities 278

Motor-vehicle head-lamps and road-lighting (R C Gowdy and J G Balsillie) 557
Motor-vehicle killings and the engineer 473

Motor Vehicles

Commercial-body supply and service 179
Detonation characteristics of some blended fuels 247
Fuels are heterogeneous mixtures 310
Head-lamps and road-lighting 557
Holding the road 256
Killings and the engineer 473
Major advantages of Winslow boiler for 270
Material in contact with road 256
New system of spring-suspension for 236
Notes on trucks 333
On rails 481
Possible boiler types 266
Progress made in garage equipment 61
Resistance of trucks 417
Tests made with four trucks 335
Unsprung weight 338
Vaporization of fuels 307
Winslow automotive boiler 265
Wood and metal wheels 335

Moving machine parts, oscilloscope in study of 196
MOYER, AMOS F, ON NEW PRINCIPLES IN ROTATIVE BALANCE 368
Mutual benefits of foreign trade 90
MYERS, C T, ON NOTES ON MOTOR TRUCKS 333

N

National Aeronautic Association 413
Natural variation of air temperature under the hood 32
Nature of action at hot-spot 474
Navigation, aeronautic 34
Need of research for the tractor industry 504
New developments in automotive industry 12
New principles in rotative balance (Amos F Moyer) 368
New system of spring-suspension for automotive vehicles (H M Crane) 236
Night flying 414
Noise, causes of gear 195

Nomenclature Division, S A E

Personnel 294, 540
Report at annual meeting 541
Subjects under consideration 556

Non-Ferrous Metals Division, S A E

Report at summer meeting 205
Subjects under consideration 556
Unaccepted recommendation 209

Notes on motor trucks (Cornelius T Myers) 333

O

Officers nominated for 1923 2
Oil consumption (A A Bull) 232, 491
Oil-pump gear noise 410
Oil-pumping (George A Round) 232
Oiliness effects 56
Oiliness, measurement of the property of 143
Oiling method and oiliness-factor effects 52

Oils

Carbon-forming properties of 38
Comparative runs with and without the refiner 44
Consumption 232, 491
Crankcase, dilution problem and its solution 35
Crankcase vac-refiner 43
Dilution of, in the present automotive engine 38
Effect of diluted, on engine friction 40
Gas leakage and 262
Influence of dilution upon the trade 37
Pumping 232
Reclaiming lubricating 157
Service tests of dilution 39
Temperature in the crankcase 43
Viscosity limits for lubrication 36
Viscosity of diluted 40

Operating tool and supply cost, control of 407
Oscilloscope in the study of moving machine parts 196
Our highways 345
Overhead-camshaft passenger-car engines (P M Heldt) 244

P

PAGE, CHARLES B, ON WINSLOW AUTOMOTIVE BOILER 265
PAGE, J F, ON CAR-OWNER VERSUS THE SERVICE-MAN 139

Papers

Annual meeting, S A E 281
Fuel and engine, at annual meeting 552
Section, S A E 292

Parabolic reflectors versus hyperbolic 559
PARISH, WILLIAM F, ON CRANKCASE OIL-DILUTION PROBLEM AND ITS SOLUTION 35
Parisian garage, modern 231

Parts and Fittings Division, S A E

Activities 117, 118, 124, 296
Personnel 541
Report at annual meeting 541
Report at summer meeting 206
Subjects under consideration 556

Passenger Car Division, S A E

Activities 118
Progress report 210
Subjects under consideration 556

Passenger-Car Body Division, S A E

Personnel 220, 542
Report at annual meeting 542
Report at summer meeting 207
Subjects under consideration 556

Passenger-car session at summer meeting 8
Piston-rings (John Magee) 273
Piston-rings and ring grooves (C R Manes) 262

Pistons

Aluminum 225
Aluminum-alloy 258
Combination and opposed, engines 100
Cylinder and, relations 258
Design 261
Effect of cooling-water temperature 226
Gas and oil leakage 262
Material conductivity effect 226
Ring-groove wear 260
Rings and ring grooves 262
Theories affecting design 228

Piston-Rings

Manufacturing difficulties 274
Ring grooves and 262
Width and form 273

PLANT, L G, ON AUTOMOTIVE RAIL-CARS AND THEIR FUTURE DEVELOPMENT 484
Plate and separator construction difficulties 351
PLIMPTON, R E, ON SOME FUNDAMENTAL CHARACTERISTICS OF PRESENT-DAY BUSES 163
Plow reactions to various hitches, tractor and (O B Zimmerman and T G Sewall) 107
Pneumatic tires, large 423
POMEROY, L H, ON ADVANTAGES OF LIGHT-WEIGHT RECIPROCATING PARTS 508
POMEROY, L H, ON FUNDAMENTALS OF INTERNAL-COMBUSTION - ENGINE DESIGN 328
Powerhouse and foundry at Ford plant 467
Power loss in pneumatic tires 157
Practical road construction (R C Schoen) 346
Present status of the Air-Mail Service (Col E H Shaughnessy, U S A) 435
Presidential address of B B Bachman 9
Pressure, effect of intake, on vaporization 311
Preventing liquid fuel reaching the cylinder 48
Principles of motorbus design and operation (G A Green) 13, 188
Processing spline shafts by a new method (James A Ford) 433
Production and wages 519
Production, cooperation in 562
Production man's place in our industry (A B C Hardy) 561
Production man's status 562

Production Meeting, S A E

Announced 281
Committeemen and co-workers 390
Dinner 390, 548
Factory visits 388
Morning sessions 387
Outline of program 373
Reviewed 387

Production notebook, experience notes from a 409
Progress made in garage equipment (H C Buffington) 61
Progress of British aeronautical research (Brig-Gen R K Bagnall-Wild) 33
Progress of development of airplanes 495
Progress of the research department (Dr H C Dickinson) 249
Publications of interest to S A E members 299, 567
Pumps, gear noise in oil 410
Puzzling engine knock 410

Q

Questions answered by the Research Department 446, 505

R

Rail Motor Cars

Field for the rail motor car 481
Future development of 484
Light construction 485
Mechanical transmission and design 481
Reliability and low maintenance cost 486
Revenue and engineering data 483
Some requirements for the 482

Railroad fares reduced for annual meeting 551
Railroad service, gasoline-driven motor-coach for 275
Railroads, trunk-line requirements 486
Rails, motor cars on 481
Rear-axle bevel-gears 437
Rear-axle gear calculations by the compressive-stress method (Joseph Jandasek) 375
Re-centering of spline shafts 434
Reclaiming lubricating oils 157
Refiner, comparative runs with and without 44

Reflectors

Corrugated 558
Hyperbolic versus parabolic 559
Types of 558

Relation of the tractor to the farm implement (G Douglas Jones) 159
Reports of divisions to Standards Committee 529
Research session at summer meeting 4

Research

Aeronautic engine 33
Cooperative fuel, session at annual meeting 552
Fuel 251
Need of, for the tractor industry 504
Progress of British aeronautical 33
Pure in universities 249
Session at summer meeting 4

Research Committee, S A E, activities 11

Research Department

Clearing-house 250
Facilities 250
Future 250
Progress of 249
Questions answered by 446, 505

Research topics and suggestions 88, 195, 256, 553
Resistance formulas 419
Resistance of trucks 417
Revenue and engineering data on rail motor cars 483
RICKER, C S, ON VALVE ACTIONS IN RELATION TO INTERNAL-COMBUSTION-ENGINE DESIGN 284
Ring-groove wear 260

Ring Grooves

Piston-rings and 262
Wear 260

Road contour 257

Roads and Highways

Automotive equipment in construction 355
Camp equipment for construction 346
Concrete requirements 325
Condition of surfaces 257
Depreciation and rental schedule of equipment 355
Earth removal 348
Economic foundation for 219
Education for engineering and transport 401
General usage 325
Holding of, by vehicles 256
Internal-combustion-engine power for grading machinery 323
Material in contact with vehicle 256
Matters presented at summer meeting 3
Motor-vehicle head-lamps and lighting 557
Operating-cost-fixed-charge-ratio 356
Our 345
Practical construction 346
Road contour 257

Rolling-Resistance

During impact 441
Of tires 438

Rotative Balance

Accuracy and rapidity of measurement 371
Machine for determining 370
Misconceptions of 372
New principles 368
Production procedure 371

ROUND, GEORGE A, ON OIL-PUMPING 232
Running-in brake-bands 409

S

S A E

Aberdeen Proving Ground visit 458
Activities of the Sections 216, 292, 380, 454, 564
Annual meeting announced 551
Annual meeting papers 281
Business session at summer meeting 2
Chicago service meeting announced 552
Council,
June and July meetings 220
July 294
September 306
October 408
Finances 10
Handbook 560
Membership 9
Officers nominated for 1923 2
Photographs of Sections officers 217, 293, 455
Production meeting reviewed 387
Section papers 292
Sections activities 216, 292, 380, 454, 564
Standard babbitt specifications 550
Standardization procedure 556
Summer meeting reviewed 1

Sands

Investigation of molding 471
Used in aluminum foundries 194

Saurer bevel-gear testing machine 193
SCHOEN, R C, ON PRACTICAL ROAD CONSTRUCTION 346
SCHWARTZ, H A, ON MALLEABLE-IRON DRILLING DATA 81
SCOFIELD, I B, ON FORD ENGINE-CYLINDER PRODUCTION 463

Screw-Threads Division, S A E

Activities 295
Personnel 543
Report at annual meeting 543
Report at summer meeting 207
Subjects under consideration 556
Unaccepted recommendation 209

Sections, S A E

Activities of 216, 292, 380, 454, 564
Lunch at summer meeting 123
Papers 292
Photographs of officers 217, 293, 455
Photographs of treasurers 454
Lunch at summer meeting 123

Sections Committee, S A E, activities 9
Selection of machine-tools (A J Baker) 520
Semi-Annual Meeting, S A E, reviewed 1
Service demands, unfair 141
Service-man versus the car-owner 139
Service-man's critical estimate of automotive engineering (B M Ikert) 173
Service-man's problem 140
Service problem 139
Service requirements of motorbus 14
Service tests of dilution 39
SEWALL, T G, ON TRACTOR AND PLOW-REACTIONS TO VARIOUS HITCHES 107

Shafts

Processing spline shafts by a new method 433
Re-centering of spline 434
Tools and methods for spline 434
Warpage of spline 434

SHAUGHNESSY, COL E H, ON PRESENT STATUS OF THE AIR-MAIL SERVICE 435
Short turning-radius of motorbuses 17
Significance of surface-tension measurements 150
Silence of operation of buses 21
Skilled workmen for standard machines 523
Society's standardization procedure 556
Solid-rubber tires 422
Solving the lubrication problem 42
Some aspects of air-cooled cylinder design and development (S D Heron) 363
Some causes of gear-tooth errors and their detection (K L Herrmann) 391
Some fundamental characteristics of present-day buses (R E Plimpton) 163
Some requirements for the rail motor-car (W L Bean) 482
Some unique features of automobile production (William Dunk) 398
South America, trade relations with 528
Spark, timing of the 182
Special fixture design 473
Special machinery 472
Specific requirements of fuel preparation 27

Specifications

Comparison of benzol with gasoline 359
Duralumin 477
S A E Standard babbitt 550

Speeds, engine 329
Sports program at summer meeting 120

Springs

Interaction of tires and 442
New system of suspension for automotive vehicles 236

Springs Division, S A E

Report at summer meeting 208
Subjects under consideration 556
Unaccepted recommendation 209

SPROULL, J C, ON CAMBER AND GATHER RELATIONSHIPS IN FRONT-WHEEL ALIGNMENT 91
Spur gears 376
Standard equipment 473
Standard-time, application of group 404
Standard versus special machine-tools for automotive production (R. K. Mitchell) 472

Standardization

Current work 117, 295, 448
Possibilities in rear-axle 334
Letter ballot on adoption of 379
S A E babbitt specifications 550
Society's procedure 556
Value of, in tractor manufacture 158

Standards Committee, S A E

Activities 11
Attendance at summer meeting 215
Reports of Divisions to 529
Session at summer meeting 1, 198
Tentative schedule of division meetings 295
Work of the 1922 555

Starting, wire for 431

Stationary-Engine Division, S A E

Report at summer meeting 208
Subjects under consideration 556

Steel

Aluminum sheets compared with 511
Comparison of aluminum connecting-rods in practice with 513
Effect of rate of heating in hardening 257
Etching reagents for alloy 34
Gage investigation 507

Steering of motorbuses, easy 18

Storage-Batteries

Capacity and life 352
Mechanical problem 350
Plate and separator construction difficulties 351

Storage-battery as a mechanical problem (Clarence W Hazelett) 350

Storage-Battery Division, S A E

Activities 118, 450, 452
Personnel 220, 545
Report at annual meeting 545
Subjects assigned 408

STOUT, WILLIAM B, ON MODERN AIRPLANE AND ALL-METAL CONSTRUCTION 495
Strength of gears 88

Stresses

Impact 440
Influence of changes in density and, on the horsepower developed 509
Rear-axle gear calculations by the compressive method 375
Wear in automobile tires 438

Structural problems of airplanes 495
Sulphur in benzol 358

Summer Meeting, S A E

Aeronautic session 4
Annual dinner burlesqued 121
Business session 2
Correction for papers 122
Entertainment for ladies 122
Fuel and engine session 6
Gratitude to committees 121
Motorbus session 8
Passenger-car session 8
Research session 4
Reviewed 1
Sections lunch 123
Sports program 120
Standards Committee session 1, 198

Supply costs, control of 407

T

Tap drill sizes 382
Technical sessions at annual meeting 551

Temperatures

Effect of cooling-water, on pistons 226
High, causes excessive valve-seat wear 566
Means of control 32
Natural variation of air under hood 32
Oil in the crankcase 43
Pneumatic truck-tires 129

Temperatures of pneumatic truck-tires (F O Ellenwood) 129

Tests

Bureau of Standards fuel 252
Deeley-type friction-machine 145
Determination of heating action 31
Dilution 39
Economy in America desirable 185
Fuels for 252
Graphic results of malleable-iron 83
Impact 457
Interpretation of data on engine 286
Made with four trucks 335
Saurer bevel-gear machine 193
Some results on tire 133
Supplementary 252

Theoretical curves for ideal bearings 50
Theories affecting piston design 228
Thermocouples, detachable 133
Thermometers, tire 131
TICE, P S, ON VAPORIZATION OF MOTOR-FUELS 307
Timing of the spark 182
Tire wear, camber and gather 92

Tires

American and European practice 443
Artificial cooling 134
Convection currents in tubes 132
Cord 421
Detachable thermocouples 133
Fabric 419
Heating of 440
Impact stresses 440
Interaction of springs and 442
Large pneumatic 423
Leakage corrections 130
Maximum mileage for motorbuses 25
Power loss in pneumatic 157
Rolling-resistance 438
Rolling-resistance during impact 441
Solid-rubber 422
Some test results 133
Static and dynamic characteristics on a smooth road 438
Stresses and wear in automobile 438
Temperature and heat 424
Temperatures of pneumatic truck 129
Thermometers 131
Tube thermocouples 132
Volume changes during operation 131
Wear per thousand miles 339
Wheels and 62
Zones of maximum wear 439
